

# Weekly Media Monitor

January 12th, 2026 – January 18th, 2026

This week's major news updates in Pakistan's energy and climate sectors:

- ⇒ The federal government prepares drafts of amendments to the NEPRA Act, 1997, and the Electricity Act, 1910, to shift key approval and notification powers from the federal cabinet to the federal Power Division.
- ⇒ The National Electric Power Regulatory Authority (NEPRA) approves uniform national tariff of 33.38 rupees per kilowatt-hour for 2026, despite the industrial sector's opposition that the tariff should not have included over 130 billion rupees worth of annual cross-subsidy that industries will have to pay.
- ⇒ The federal government estimates that Pakistan requires 565.7 billion US dollars by 2035 to meet its latest Nationally Determined Contributions (NDCs 3.0) climate targets for emission reductions, renewable energy expansion and electric vehicle adoption.
- ⇒ A federal government report on the state-owned enterprises states that the power sector recorded negative equity of 800 billion rupees in 2025, as its six distribution companies continued to incur massive losses.
